TIPS:

⁽¹⁾ **Seasonal salad** (from non-starchy vegetables) may be raw or boiled. As for the total amount of olive oil (for lunch and dinner), it should be equal to 2 tablespoons (1 tablespoon= 3 teaspoons)

In meals such as meat, rice, sauces and purees try to add vegetables, so that the daily consumption of vegetables is increased (e.g. carrot puree, tomato sauce, broccoli bites)

Quantities are based on cooked food, normally prepared with ½ - 1 tbs olive oil per food serving.

Feel free to consult the unit "Food Groups" in order to make changes and to develop your own diet based on your own nutritional preferences.

Meat, fish and legumes belong in the group of proteins

Rice, potatoes and bread belong in the group of carbohydrates

Olive oil and nuts belong in the group of fat.

The Food Group of "**Free Foodstuff**" consists of products that include less than 20kcal/ portion or less than 5g of carbohydrates/ portion. You may consume up to 3 portions of "Free Foodstuff" daily. In case of hypertension problems, you have to be extremely careful with food that are high in salt.
